

WHAT IS CLAIMED IS:

1. An isolated polynucleotide comprising a contiguous  
5 stretch of at least about 60 nucleotides first disclosed in at  
least one of SEQ ID NOS: 1-1,461.

2. An isolated polynucleotide according to Claim 1,  
wherein said polynucleotide sequence comprises at least one of  
10 SEQ ID NOS: 1-1,461.

3. An *in vitro* process for producing an isolated  
polynucleotide incorporating a sequence capable of hybridizing  
to a sequence first disclosed in one of SEQ ID NOS: 1-1,461,  
15 comprising the steps of:

- a) obtaining a polynucleotide template encoding a  
sequence capable of hybridizing to an GTS of SEQ ID  
NOS: 1-1,461;
- b) contacting said template with a polynucleotide probe  
20 comprising at least about 25 contiguous bases first  
disclosed in SEQ ID NOS: 1-1,461;
- c) processing the combined probe and template to allow  
the specific detection of the combined probe and  
template; and
- d) isolating a clone encoding said template.

4. The process of Claim 3 wherein said template is  
mammalian cDNA.

5. The process of Claim 3 wherein said template is  
30 mammalian genomic DNA.

6. A process according to Claim 4 wherein said template  
is of human origin.

7. A process for identifying novel polynucleotide  
35 sequences comprising the steps of:

Add  
A2

- 5
- a) retrieving a computer readable representation of a polynucleotide sequence first disclosed in at least one of SEQ ID NOS: 1-1,461, or an amino acid sequence encoded thereby, from a computer addressable form of electronic data storage medium;
- b) retrieving a computer readable representation of a test polynucleotide or polypeptide sequence from a computer addressable form of electronic data storage medium; and
- 10 c) comparing the sequence of said test polynucleotide or polypeptide sequence to a sequence first disclosed in at least one of SEQ ID NOS: 1-1,461, or an amino acid sequence encoded thereby.

15 / 8 An isolated murine embryonic stem cell line comprising an engineered retroviral gene trap vector in at least one gene comprising a polynucleotide sequence first disclosed in one of SEQ ID NOS: 1-1,461.
